Life after PhD: Startups

The path from discovery to commercial product and the path from science lab to establishment of a biotech company.

23/10/2018

With **Dr. Milos Dendis**

room 211, building A35

University Campus Bohunice

**14.00–15.00 + Discussion
& Individual Consultations**

What to expect

- First-hand experience of adventurous journey from laboratory results to commercialized product and from scientific laboratory to biotech company
- How important is defining a goal
- How important is making a plan
- How important is not sticking to the plan

Milos Dendis

Graduated from molecular biology and genetics on Masaryk University Cofounder of successful Czech biotech company GeneProof As CRO responsible for transfer of scientific ideas into the commercial products Specialized on interdisciplinary cooperation (networking)

Life after PhD is a series of meetings with successful scientists from academia, business and public sector. The visitors share their valuable first-hand experience with specific scientific career track and tackling the challenges along the way. You can expect a lot of inspiration, open discussion and material for planning your future in science.
